R1 source layer 3 / g0.w0 / Dispatch | 320 endpoints, EP256 + EP64, batches 6/6/3
Exact-next-sequence acceptance; same source workload in every condition
Full payload; shaded: artificial fault window
Final 80 KiB: tail completion
Cumulative protocol-accepted payload (KiB)
Simulation time (us)
400G / no injected loss
25G / no injected loss
25G / 50% window
25G / 75% window
25G / short blackout
25G / persistent blackout
